FOR IMMEDIATE RELEASE

WILLIAMS STONE INTRODUCES RUSTIC GRANITE HERITAGE CURB FOR AN OLD-WORLD LOOK

EAST OTIS, MA, February 26, 2014 — Williams Stone Company, Inc., today announced its new Heritage Curb, an all-natural, environmentally friendly, extremely durable, rough-split granite curb designed to lend an old-world look to any street, parking lot, driveway or landscaping application.

These rustic curbing blocks provide secure protection for sidewalks, shoulders, driveways and yards. The rough-split finish also affords a level of protection for vehicle tires. When installed properly, Heritage Curb easily withstands winter weather and snow plow abuse. It is so strong it can even be recycled and used again as landscape plans change over the years.

Heritage Curb is made from William's Blue-Sky™ granite, a blue-gray stone with split faces, split top and sawn sides. Block dimensions vary from 3- to 5-inches thick, 12- to 14-inches high and 12- to 18-inches long. Yield is approximately 30 linear feet per ton. Cost is \$195 per ton, loose in dump trailers or \$250 per ton on pallets.

Located in the Berkshire Hills of Western Massachusetts, Williams Stone Company was founded in 1947 and today is an employee owned and operated business. It owns quarries there and in Georgia that provide granite for fabrication in its East Otis, Massachusetts complex and shipment throughout the United States. The company manufactures curbing products used in highway and bridge construction, paving blocks, veneers, and a wide variety of architectural-quality granite landscaping site amenities. Visit www.williamsstone.com for further information.
