TIMELESS GRANITE CURBING... PRICELESS CUSTOMER SERVICE

TIMELY 72-HOUR DELIVERY ON MOST COMMON CURB TYPES & SIZES

Williams Stone Company maintains one of the largest inventories of standard granite curbing and landscape products in the Northeast United States. This allows us to deliver most common curb types and sizes within 72 hours—the right products at the right time to meet your critical installation deadlines.

OUR COMMITMENT TO CUSTOMER SATISFACTION

Ever since Lester Williams and Verna Stone got together and sold their first piece of granite in 1947, the Williams Stone Company has been committed to providing customer service that is as dependable as the granite we quarry. And a long list of satisfied clients can attest to our success in achieving that goal.

Half a century later, we are still a family owned and operated company with an unyielding dedication to provide our customers with highly attentive service and timeless product quality at a fair price. That was our philosophy when we started, and it is our promise to you today.

- Granite bounds

PRODUCTS AND SERVICE SHOW OUR STYLE

WHY SPECIFY GRANITE?

1

Granite is timeless! It endures in the most rigorous environments – for decades, even generations. Architects, commercial developers and civil engineers prefer the long-lasting durability and natural beauty of granite. It withstands severe weather conditions, harsh road chemicals, the punishment of snowplows, freeze-thaw cycles and the abuse of constant traffic. Granite curbing is said to have an “indefinite” life expectancy because it does not deteriorate like other curbing materials. It is so durable it can be removed and re-used, or reset when the amount of exposed curb decreases due to road resurfacing.

2

Granite is cost effective! While sometimes initially slightly higher in price than some competitive materials, such as asphalt and pre-cast concrete, numerous life-cycle studies have proved conclusively that granite curbing lasts significantly longer and returns far greater value over the life of the installation. It seldom needs to be replaced or repaired; it has always been the first choice of designers who build lasting quality into their projects. Granite simply lasts longer. Rigorous applications like street curbing, parking lot islands, handicap ramps, curb inlets and retaining walls demand the lasting value and virtual indestructibility of granite.

3

Granite is looks great! Its decorative appeal lends authenticity and timelessness to historic renovations. Its natural texture complements practically any setting, whether a towering architectural masterpiece or the restful aura of an inspired landscape design.

4

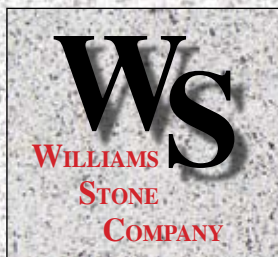

Granite is readily available! Wherever your project is in the Northeast United States, our vast inventory and flexible manufacturing operation allows us to deliver most common types and sizes of curbing within three business days of time of order.

MODERN, EFFICIENT MANUFACTURING

Since it was founded in 1947, the Williams Stone Company has continued to invest in the most advanced equipment available, making its production operation in East Otis, Massachusetts, one of the most modern in the granite curbing industry. These advances, combined with highly skilled operators and technicians, allow extremely efficient production of both standard and custom curbing, superior quality, yet at extremely competitive cost.

We work hard to dispel the old rule-of-thumb that says you must choose between quality, price and service, but can have only two. With Williams Stone Company you really do get all three!
